Geophysicist/Data Analyst

Sander Geophysics (SGL) specializes in high-resolution airborne geophysical surveys for petroleum and mineral exploration, as well as environmental applications. The company carries out airborne gravity, magnetic, electromagnetic, and radiometric surveys, using fixed-wing aircraft and helicopters.

Sander Geophysics is currently seeking early career Geophysicists to join the growing team. You will be working at the head office location in Ottawa, Ontario, Canada, and also at our global field project locations which occur on all continents.

Responsibilities of the Position

- Airborne survey design
- Field data acquisition and quality control
- Assistance with field operations logistics
- GPS and altimeter data processing
- Processing of airborne magnetometer, gamma-ray spectrometer, frequency domain electromagnetic, gravimeter and/or methane data
- Preparation of data deliveries and technical reports

Required Qualifications:

- University Degree in Earth Sciences, Geophysics or Physics
- Experience/Familiarity with geophysical instrument operations
- Extensive Computer experience
- Willing to travel globally for extended periods
- Must have a valid passport or the ability to obtain a valid passport for the purpose of traveling globally
- Valid driver's license
- Legally entitled to work in Canada
